ABSTRACT

This report briefly describes about the seventh semester mid-term defense on an e-commerce website, “E-Mart”. Over the past decade, e-commerce has transformed the way the business is being done in the developed world. But in Nepal, it is still in its infancy. Therefore, we have started this project with the intention of building a domestic e-commerce website suitable for Nepali community. The main goal of this project is providing consumer-to-consumer and business-to-consumer sales services via the Internet. It would be the platform where the seller can advertise their products and the buyer can purchase their product of interest directly from the seller. This website is also able to take data from user views and create its own dataset. We intend to implement artificial intelligence to provide recommendations for customers and provide chat-filters.

Keywords: *E-commerce, virtual market, transaction.*

TABLE OF CONTENTS

Chapters	Title	Page
	Title page	i
	Abstract	ii
	Table of Contents	iii
	List of Figures	iv
1.	Introduction	
	1.1 Background	1
	1.2 Motivation	1
	1.3 Statement of problems	2
	1.4 Objectives	2
2.	Literature Review	3
3.	Methodology	
	3.1 System Block Diagram	5
	3.2 Use Case Diagram	6
	3.3 ER Diagram	7
	3.4 Work Schedule	8
	3.5 Tools and Platform	8
4.	Expected Results	
	4.1 Work Done	9
	4.2 Work to be Done	9
	References	10
	Appendix	11-14
